### MODES OF OPERATION

The IDS 440 is a versatile indicator for use in various industries and applications that can range from basic weighing, material testing to more complex formula batch weighing. The IDS 440 is housed in a rugged stainless steel enclosure and provides a universal mounting bracket for wall or desk mounting. The viewing angle can be adjusted for the best possible view of the weight. The bright red 1 inch high LED display makes it easy to read the weight from longer distances compared to other indicators. The keyboard features large keys which give you tactile and audible confirmation of data entry. The IDS 440 is programmable in a easy and flexible macro language called Scale Basic™. In addition to the built-in modes of operation, Scale Basic allows you to customize the operation of the IDS 440 to meet your application requirements. The Scale Basic language provides various commands and functions that include: math operations, I/O control, setpoints, timers, data entry, ID storage, message display, and program sequence control among others. Programming the IDS 440 can be performed through the keyboard or a PC using the optional EZ-LINK™ software that greatly facilitates setup and programming.

**MODE 0 - Normal**
- Basic gross, tare and net weighing

**MODE 1 – Fill to Setpoint**
- Single setpoint fill with relay output control and weight print

**MODE 2 - Over/Under Checkweigh**
- Provides 3 TTL outputs and 2 setpoints to indicate over, under and between weight conditions. Outputs can activate lights or alarms

**MODE 3 – Vehicle Weigh-In/Out with Totals**
- Weigh-In/Out program for up to 500 vehicles; Maintains running totals for each vehicle; Provides reporting functions

**MODE 4 - Multi-Container/Axle Auto Weighing**
- Auto weighs and prints each weight placed on the scale; Each weight is sequentially numbered and accumulated; The total can be printed manually or automatically; Provides traffic light control

**MODE 5 - Auto Axle Weigh (Long Scales)**
- Same as Mode 4 but previous axles are auto tared

**MODE 6 – ID Tare, Print and Total**
- Provides tare entry and recall by ID; Prints ID, sequence # and GTN weights; Keeps running totals by ID; Provides reporting functions

**MODE 7 - Peak Hold Mode**
- Display or print the peak gross or net weight detected
